

Nithin Raghavan

(678) 200-5839 — rnithin@berkeley.edu — rnithin1 (Github) — linkedin.com/in/nithinraghavan

EDUCATION

University of California, Berkeley (Class of 2020)

Aug 2017 – present

Computer Science *Bachelor of Arts*, Applied Mathematics *Bachelor of Arts*

(GPA: 3.59)

- CS61B: Data Structures
- CS170: Efficient Algorithms
- EE127: Optimization Models and Applications
- Math 128a: Numerical Analysis
- Math 126: Partial Differential Equations
- CS189: Introduction to Machine Learning

Georgia Institute of Technology

Aug 2015 – May 2017

Courses Taken while in High School

- Applied Combinatorics
- Number Theory and Cryptography

EXPERIENCE

Mobile Sensing Lab, UC Berkeley

Oct 2018 – Present

- Currently writing code implementing a parallelized Frank-Wolfe algorithm for dynamic traffic assignment in C++/CUDA using contraction hierarchies
- Helping research the impact of different optimization models of routing behaviour on the Waze problem

RISE Lab, UC Berkeley

Jun 2018 – Dec 2018

- Designed and implemented a data visualization tool for Jupyter Notebook for hyperparameter optimization for Cirrus, a serverless machine learning framework
- Helped write code involving AWS Lambdas for model primitives such as logistic regression

IBM Almaden Research Center, Machine Learning Laboratory

Jul 2017 – Aug 2017

- Trained an artificial neural network with visual question answering abilities on Stanford's CLEVR dataset with 70% overall accuracy
- Implemented sequence autoencoders, CNNs and LSTMs with Tensorflow and Keras

PROJECTS

Resource-Provisioning GPU Server

Dec 2017 – present

- Developed a Python-based shell to automate on-demand request processing and resource provisioning in a GPU + CPU cluster
- Collaborated on a team to create a program that utilizes Slurm for cluster management and deploys tasks in Docker containers

TaxiFindMe

Apr 2018

- Routing web app that helps New Yorkers find the best spot to minimize taxi waiting time, taking into account travel time and time of day
- Preprocessed 20 million entry taxi dataset with k-means machine learning algorithm; for querying, KNN is run from an input location to find nearest cluster. Frontend employs Django
- Reduced query time up to 94% from the naive implementation

ShirtMapper

Jan 2018

- App that resizes images of custom shirts and maps them onto people
- Utilizes OpenCV and Scipy, and uses Haar classifiers for edge detection; frontend employs React Native

SKILLS

Awards: Exploravision National Contest

2016

- Wrote a paper proposing blockchain's potential link to autonomous vehicles, and won honorable mention.

Models/Algorithms: Regression/classification (ridge, logistic, SVM, decision trees, OLS), PCA/SVD, ensemble learning, k-means, deep learning (CNNs, LSTMs), Frank-Wolfe

Frameworks/Softwares: Numpy, Scipy, Sk-learn, Pytorch, OpenCV, Docker, Slurm, d3js, CUDA

Programming Languages: Python, Java, C, C++, C#, Bash, Latex, SQL, JavaScript, Matlab

Operating Systems: Unix-like systems (Linux, FreeBSD, Mac OS X), Windows

Certifications: Android Development (University of Maryland through Coursera)
